

First of all i pay for this service & I shouldnt be told what i can & can't listen to when i am paying xm for that service. No where else can i find the type of music i want to here the weather when i need it no matter where i am. i travel alot visiting family & its usually after work late at night xm has stations that make me enjoy my freedom that is why you should not worry about what xm radio provides for their listeners & they have parental control so you can block what you want. My wife & i enjoy xm radio on the road & at home we have two recievers & again i pay for this service so please let xm radio continue this amazing innovation in radio broadcast. we are trying to move foward & not back unfortuntnly things have to change & so does radio for the better. thank you cortina family
